SECTION A

QUESTION 1

1.1 MULTIPLE CHOICE

- B√√ 1.1.1 A√√ 1.1.2 1.1.3 B√√ 1.1.4 A, B, C ✓ ✓ B√√ 1.1.5 1.1.6 D√√ C√√ 1.1.7 A, D √ √ 1.1.8 B√√ 1.1.9
- 1.1.10 C ✓ ✓

(10 x 2) (20)

1.2 MATCH COLUMN A AND COLUMN B

- 1.2.1 G ✓ ✓
- 1.2.2 E ✓ ✓
- 1.2.3 K ✓ ✓
- 1.2.4 J ✓ ✓
- 1.2.5 C ✓ ✓
- 1.2.6 D√√
- 1.2.7 H√√
- 1.2.8 B√√
- 1.2.9 A√√
- 1.2.10 F ✓ ✓

(10 x 2) (20)

(5)

1.3 AGRICULTURAL TERMS

- 1.3.1 Budget ✓
- 1.3.2 Sorting ✓
- 1.3.3 Basic Conditions of Employment Act ✓
- 1.3.4 Surplus / Glut✓
- 1.3.5 Current / short term liabilities ✓

1.3 UNDERLINED WORDS

- 1.4.1 Management / Crop rotation/ Sustainability ✓
- 1.4.2 Capital ✓
- 1.4.3 Stability ✓
- 1.4.4 Topography√

		•		
1.4.5	Contra	act m	narketir	۱g√

- (5 x 1) (5)
- TOTAL SECTION A: 50

(5 x 1)

SECTION B

QUESTION 2: PHYSICAL AND FINANCIAL PLANNING

2.1 **Negative influence of strong winds on crop production**

- The wind can damage the leaves, flowers, and fruit setting ✓ this will lead to a reduction in photosynthesis ✓ and thus lower production. ✓
- More transpiration and evaporation ✓ plants to stress more ✓ production will be lower. ✓
- Plants can also be uprooted ✓ or be blown over ✓ this will result in no production√
- Plants are smaller√, grow abnormally√ and low production √
- Pollination negatively affected ✓ less fruit form ✓ thus lower production ✓

(Any 3) (3)

(1)

(4)

2.2 Agricultural Acts

2.2.1 Farm workers have the right to work in a safe environment

• Occupational Health and Safety Act, 1993 (Act 85 of 1993) \checkmark

2.2.2 FOUR protective measures

- Wash their hands after using the chemicals \checkmark
- Wear protective clothing like overalls with long sleeves, masks√
- Never pour chemicals from hand to hand but on a stable surface \checkmark
- Mix chemicals according to instructions of manufacturer ✓
- Be properly trained to work with chemicals \checkmark
- Don't bring chemicals close to water, food, fish and animals \checkmark (Any 4) (4)

2.3 **Needed capital**

	Long-term capital (fixed capital)	Medium-term capital (movable capital)	Short-term capital (working capital)
Livestock		\checkmark	
Implements		\checkmark	
Fences	\checkmark		
Wages			\checkmark

2.4 **Types of labour**

2.4.1	Seasonal worker	(1)
2.4.2	Permanent/ full-time employee√	(1)
2.4.3	Casual / occasional labour/ contracted workerv	(1)

(Any 5)

(5)

2.5 **Protecting soil fertility and erosion**

- Additional organic material reduce erosion√
- Better groundcover reduce erosion√
- Use zero/minimum tillage for better soil cover√
- Correct cultivation-/ irrigation- /grazing practices√
- Reduce length of slope to reduce speed of water that contributes to erosion \checkmark
- Mulching reduce erosion ✓

2.6

		Commercial farming system	Subsistence farming system	
2.6.1	Technology	Mechanised/	Use animal traction/hands /	
		More ✓	Less√	
2.6.2	Outputs	Large amounts √	Small amounts √	

2.7 Resource utilization and grazing management

2.7.1 Evaluate the sizes of the camps

- The farmer must fence veld types with the same potential and palatability of grazing together ✓
- If the natural veld is more palatable ✓ the farmer needs a smaller area ✓ to get the same nutrition for the livestock. ✓
- If the natural veld is less palatable ✓ the farmer needs a bigger area ✓ to get the same nutrition for the livestock ✓ (Any 2) (2)

2.7.2 THREE advantages of a wagon wheel layout

- The water trough is in the middle of all the camps \checkmark
- Only one trough to maintain \checkmark
- Reduces labour costs ✓
- Reduces time, energy and money spend on maintenance \checkmark (Any 3) (3)

2.7.3 **Problem of rotational grazing between camps of different size and** nutrition

The time ✓ that the animals spend in a small camp should be shorter and vice versa ✓

2.7.4 **Reasons for resting camps**

- The maximum production of grazing material can then take place \checkmark
- Mature climax grasses can form seeds ✓
- Young plants can get the opportunity to establish themselves \checkmark
- Further root development can take place
- Plants can recover after grazing \checkmark
- Prevent overgrazing ✓

Arry 5) (3

2.8 Soil properties

2.8.1 Soil colour

- Red / yellow soils have good drainage \checkmark and crops will grow well if sufficient water is available \checkmark
- Dark / brown soils are rich in organic matter ✓ and have a natural 'fertility' making them good for crop production ✓
- Grey soils are waterlogged soils \checkmark and not good for crop production \checkmark

(Any 2 x 2) (4)

2.8.2 Soil texture

- Sandy soils have a fast infiltration ✓ rate but does not hold water ✓ soil will produce well if enough rainfall present ✓
- Sandy soils are less fertile than clay soils and more fertilisers ✓ need to be added to sandy soils than to clay soils ✓ to obtain good production ✓
- Clay soils have a slow infiltration ✓ and hold water better ✓ good for production ✓
- Clay soils are also more fertile ✓ because of nutrients retained ✓ good for production ✓ (Any 2 x 3) (6)

2.9 Soil pollution

2.9.1 Soil degradation

- A too high concentration of pesticides will kill soil organisms (bacteria/ earthworms) </
- Infertility of soil leads to bare areas and no vegetation \checkmark
- Contribute to loss of ecosystems ✓

2.9.2 Water pollution

- A too high concentration of pesticides from the polluted soil drain ✓ into the ground water and cause pollution of the ground water ✓
- Pesticides drift can pollute water sources √ (Any 2)

2.10 Use of animal traction on the farm

- Ploughing ✓
- Pulling a cart to deliver lick/transport material etc.√
- Gathering and counting livestock/checking fences ✓
- Transporting people < (Any 2) (2)

QUESTION 3: ENTREPRENEURSHIP, RECORDING, MARKETING, BUSINESS PLANNING AND ORGANISED AGRICULTURE

3.1	 FOUR aspects a farmer should consider in conducting a market survey Location of the market /demographic of the market ✓ The products that consumers need ✓ The price consumers are willing to pay for the product ✓ Expectations of the consumers on the product you are producing ✓ Competitors producing the same product ✓ (Any 4) 	(4)
3.2 3.2.1	Agricultural businesses Primary agricultural sector • Vegetables ✓ • Dairy ✓	(2)
3.2.2	 Secondary agricultural sector Agritourism✓ Abattoirs✓ 	(2)
3.2.3	 Tertiary agricultural sector Feed companies√ Irrigation supplier √ 	(2)
3.3 3.3.1	 Comparison of free and cooperative marketing Less bargaining power ✓ 	(1)
3.3.2	 High marketing costs ✓ 	(1)
3.3.3	 Less protection ✓ 	(1)
3.3.4	 High bargaining power ✓ 	(1)
3.3.5	 Low marketing costs per unit ✓ 	(1)
3.3.6	 More protection ✓ 	(1)
3.4.	Need for finance in the process of selling produce• For transport costs√• For storage costs√• For labour costs√	(2)
3.5	 Price determination Cost ✓ – it determines the minimum price that one can sell produce to make a profit. ✓ Demand ✓ – the higher the demand for a specific product, the higher the price will be and vice versa. ✓ Competition ✓ – competitive products will have an influence on the price. ✓ 	(6)

3.6		e market with your product he supply ✓ from other prod		(4)
3.7 3.7.1	Crop production budget			(-)
0.7.1	. .	e income and expenses of a	business√√	(2)
3.7.2	Crop production budget (a) R80,00√ (b) R85,00√ (c) R1 600,00√ (d) R10 012,00√ (e) R22 500,00√	: Missing values		(5)
3.7.3	 Profit/ loss=R22 500–F 	ne minus total expenses (Fc ₹10 012✓ (CA-marking) ✓ (profit) because the exp	,	(4)
3.7.4	 Basic elements of a bud Estimated income for a Estimated cost/expend 	a certain period√		(2)
3.8	List of farming enterprise			
	Production record	Physical record	Financial record	

Production record	Physical record	Financial record
 Crop yield per ton of fertilizer. ✓ 	 Workshop tool inventory√ 	 Cash flow ✓
 Number and condition of young animals born√ 	 Stock of seeds for the next planting season ✓ 	 Workshop tool inventory√

3.9 Balance sheet

3.9.1 Increase in asset

- Land and building: ✓ Fixed assets will grow in value over time with normal maintenance√
- Livestock: ✓There could be in increase in livestock numbers✓
- Cash \checkmark Selling more products/obtain higher prices for products \checkmark

(Any 1 x 2) (2)

(5)

(1)

(1) **[50]**

3.9.2 Increase in liability

Accounts payable√

3.9.3 Reason for lower value

• Depreciation ✓ (wear and tear/old)

QUESTION 4: HARVESTING, PROCESSING, MANAGEMENT AND AGRITOURISM

4.1 **Farm Management**

4.1.1 **Reasons for planning**

- Change in resource patterns ✓ how resources are available and the balance between these resources requires new planning ✓
- Change in technological and biological relations ✓ new technology used required new planning ✓
- Change in prices ✓ higher input costs require new planning regarding products produced. ✓
- Risks and uncertainties ✓ Review is a continual process, some aspects are beyond the farmers control and requires review. ✓ (Any 3 x 2) (6)

4.1.2 **Steps in the planning process**

- Formulate objectives and goals. ✓
- Collect information. ✓
- Analyse information. ✓
- Develop alternatives√
- Choose between alternatives. ✓
- Implementation and evaluation ✓.

4.2 **Reasons for employer/employee contract**

- It is a legal requirement√
- Establish legal agreement√
- Protects the right of both parties ✓
- Formally defines terms of employment ✓
- It can be referred to if a dispute arises ✓
- Defines what is expected (job description) ✓
- Contains the basic conditions of employment ✓ (Any 5) (5)

4.3 **Storage of agricultural products**

4.3.1 Temperature

Must be cool /suitable temperature ✓

4.3.2 Ventilation

Must be sufficient air circulation/enough oxygen/low carbon dioxide levels ✓

4.4 Food processing

4.4.1 **Aim of processing food**

- To bring high quality food / Prevent spoiling or decay/longer shelf-life ✓✓
- Value adding / Higher prices ✓✓

4.4.2 Discuss THREE disadvantages of processing

- Difficult to acquire capital to start new venture ✓
- New products compete with established products \checkmark
- Lack of expertise by the farmer in a competitive market \checkmark
- Change in physical appearances and taste ✓ (Any 3) (3)

(6)

(1)

(2)

4.4.3	 THREE requirements of Ideal packaging material Light weight√ Transparent√ Easily opened and closed√ Non-toxic√ Hygienic √ Adjustable with food √ Protection of the product √ Tamperproof √ Easy to print or labelling √ Resistant to mechanical and thermal damage √ Environmentally friendly √ Cost effective √ Easily disposable √ 	(Any 3)	(3)
		(Any S)	(3)
4.4.4	 Types of packaging material Rigid ✓ Semi-rigid ✓ Flexible ✓ 	(Any 2)	(2)
4.5 4.5.1	 Food safety Food handling strategies Regular monitoring and surveillance by health authority ✓ Management of food handling process ✓ 	(Any 1)	(1)
4.5.2	 Principles of health in food handling Education and training ✓ Reporting of illness/health interviews ✓ Management commitment ✓ 	(Any 2)	(2)
4.6 4.6.1	Value adding methods Meat – graded,✓ cuts,✓ dried ✓ and packed✓		(4)
4.6.2	Wool – sheared,✓ graded,✓ packed✓		(3)
4.6.3	Grains – graded, \checkmark milled, \checkmark packed, \checkmark baked \checkmark		(4)

4.7 Agritourism

4.7.1 Reasons behind the positive increase in the agritourism

- People are looking for new experiences/adventure/recreation/ uncomplicated life/less technology. ✓
- It is local therefore people can spend more money because travelling costs are reduced. \checkmark
- Parents want children to experience the country life/get educated in farm life. \checkmark
- Farmers diversify- reducing risks ✓
 - increase income ✓
 - optimize use of resources ✓
- Farmers can enjoy sharing farm lifestyle with other people/meet interesting people/socialize more. ✓ (Any 4)

4.7.2 Agritourism contributes to the economic objectives of the country

- Jobs are created /increase employment \checkmark
- Training is provided and people are empowered. \checkmark
- Communities benefit from the development/living conditions are improved/ transport services/vegetable gardens/ entrepreneurial possibilities
- Conservation of resources takes place \checkmark
- Increasing revenue of the area and/or country \checkmark (Any 3) (3)

[50]

(4)
