

4.6.3 Physics Paper 3 (232/3)

MARKING SCHEME **RDIC Compressor Free Version**

1.	$I_1 = 0.3 \text{ mA}$							(1 mark)
a)								
b)	$I_2 = 0.37 \text{ mA}$							(1 mark)
c)	$R \times 10^3 (\Omega)$	0.330	1.0	1.33	1.5	2.5	4.0	(6marks)
	$I \text{ mA}$	0.69	0.53	0.48	0.44	0.35	0.26	
	$I \times 10^{-3} (\text{A})$	0.69	0.53	0.48	0.44	0.35	0.26	
	$1/I \text{ A}^{-1}$	1.45	1.88	2.08	2.27	2.86	3.84	
d)	Attach graph of $\frac{1}{I}$ against R.							(4 marks)

e)	i. Slope = $\frac{2.5-1}{2.5-0}$ = 0.60	(3 marks)
ii	I $(I) \frac{1}{I} = \frac{R}{E} + \frac{R_1}{E}$ $\frac{1}{I} = \frac{1}{E}(R + R_1)$ $\therefore \frac{1}{E} = \text{Slope} = 0.6$ $E = \frac{1}{0.6} = 1.67$	(3 marks)
	II $\frac{R_1}{E} = \frac{R_1}{1.67} = y$ intercept = s	(2 marks)

## QUESTION 2

### PART A MARKING SCHEME

a)	A = 60° l = 5.2cm	(1 mark) (1 mark)
b)	Normal at 3 <sup>rd</sup> way □ 1.5 from A (From the candidates outline)	(2 marks)
e)	D <sub>1</sub> = 41° D <sub>2</sub> = 39° D <sub>3</sub> = 40°	(1 mark) (1 mark) (1 mark)
f)	i. D <sub>m</sub> = $\frac{41^\circ + 39^\circ + 40^\circ}{3} = 40^\circ$	(1 mark)
	ii. $k = \frac{\sin \frac{(60+40)}{2}}{\sin \frac{60}{2}}$ $= \frac{\sin 50}{\sin 30}$ = 1.53	(3 marks)

**PART B****PDF Compressor Free Version**

g)	$\theta_0 = 24\text{ }^\circ\text{C}$	(1 mark)
h)	$t_1 = 1.59\text{ sec}$	(1 mark)
i)	$t_2 = 3.00\text{ sec}$	(1 mark)
j)	(I) $x = \frac{77.5 - 24}{1.59}$ $= 33.65$	(2 marks)
	(II) $y = \frac{67.5 - 24}{3.00}$ $= 14.5$	(2 marks)
k)	It is greater than x because the cooling rate depends on the difference between the highest temperature and the room temperature.	(2 marks)
