SECTION A

ANSWER ALL QUESTIONS

<p>1. (a)</p> <p><i>- Thiba ✓</i> <i>- Nyamindi ✓</i> <i>- Murubara ✓</i></p>	<p>Name <b>two</b> rivers that supply water to Mwea-Tebere irrigation scheme.</p> <ul style="list-style-type: none"> <li>- River Thiba ✓</li> <li>- River Nyamindi ✓</li> <li>- River Murubara ✓</li> </ul>	<p><i>max 02</i></p> <p>Any 2 x 1 = 2 marks</p>
<p>(b)</p> <p><i>- detainees ✓</i> <i>- free labour ✓</i> <i>- landless ✓</i> <i>- floods ✓</i> <i>- food ✓</i> <i>- black soil ✓</i> <i>- max. use of land ✓</i></p>	<p>State how government policy influenced the establishment of Mwea-Tebere irrigation scheme.</p> <ul style="list-style-type: none"> <li>- There was need to keep <u>detainees</u> busy. ✓</li> <li>- For people to provide <u>free labour</u>. ✓</li> <li>- There was need to settle <u>landless</u> people. ✓</li> <li>- The need to <u>control flood</u> of rivers that pass through the area. ✓</li> <li>- <i>To increase food production ✓</i></li> <li>- <i>for maximum utilization of lands ✓</i></li> <li>- <i>to fully utilize the black cotton soil ✓</i></li> </ul>	<p><i>max 03</i></p> <p>Any 3 x 1 = 3 marks</p>
<p>2 (a)</p>	<p>Define the term fisheries.</p> <ul style="list-style-type: none"> <li>- Fisheries are water bodies where exploitation of aquatic organisms/life is carried out. ✓</li> </ul>	<p>Any 3 x 1 = 3 marks <b>(05)</b></p> <p>02</p> <p>2 marks</p>
<p>(b)</p> <p><i>- S. Africa ✓</i> <i>- Namibia ✓</i> <i>- Angola ✓</i></p>	<p>Name <b>three</b> countries in Southern Africa that are important for marine harvesting.</p> <ul style="list-style-type: none"> <li>- South Africa ✓</li> <li>- Namibia ✓</li> <li>- Angola ✓</li> </ul>	<p><i>03</i></p> <p>Any 3 x 1 = 3 marks <b>(05)</b></p>

789

3 (a)	<p>What is renewable source of energy?</p> <ul style="list-style-type: none"> <li>- A renewable energy source is that source that can be <u>replenished</u> and <u>reused</u> (inexhaustible) (used over a long period of time).</li> </ul>	<p>Any 2 x 1 = 2 marks <b>02</b></p>
3 (b)	<p>Name three main Hydro Electric power stations along River Tana.</p> <ul style="list-style-type: none"> <li>- Masinga ✓</li> <li>- Kamburu ✓</li> <li>- Gitaru ✓</li> <li>- Kindaruma ✓</li> <li>- Kianbere ✓</li> <li>- Tana. ✓</li> </ul>	<p>Any 3 x 1 = 3 marks <b>03</b> <b>05</b></p>
4 (a)	<p>Define internal trade</p> <ul style="list-style-type: none"> <li>- This is the exchange of goods and services <u>within a country</u>.</li> </ul>	<p>Any 2 x 1 = 2 marks <b>02</b></p>
4 (b)	<p>Give three ways in which Kenya has benefited from regional trade.</p> <ul style="list-style-type: none"> <li>- It earns foreign exchange from exports. ✓</li> <li>- Increases employment opportunities. ✓</li> <li>- Opens up large market for goods. ✓</li> <li>- It reduces tariffs making goods cheaper. ✓</li> <li>- It promotes industrial growth and development. ✓</li> <li>- It enhances international cooperation and political understanding. ✓</li> </ul>	<p>Any 3 x 1 = 3 marks <b>03</b> <b>05</b></p>

- Masinga ✓
- Kamburu ✓
- Gitaru ✓
- Kindaruma ✓
- Kianbere ✓
- Tana ✓

- Foreign exchange ✓
- employment ✓
- market ✓
- tariffs ✓
- industrial growth ✓
- inter. cooperation ✓
- transport ✓
- research ✓
- goods ✓
- revenue ✓

- It improves transport/communication. ✓
- It promotes exchange of research findings/ideas ✓
- It readily avails goods/services needed by the people ✓
- It's a source of government revenue in the form of duties/tariffs. ✓

78

5. (a) Outline **three** factors that influence development of linear settlement pattern.

- People settle along rivers for water provision. ✓
- People settle along roads/railway line for ease of transport. ✓
- People settle along lakes/shores for fishing activities. ✓
- People settle along ridges for easy house construction and security. ✓
- People settle along forest fringes to access forest products along the foot/base of bottom of escarpments for houses/farming ease of house construction.

Max 03

Any 3 x 1 = 3 marks

(b) Give two differences between the ports of Mombasa and Rotterdam.

- Rotterdam handles more cargo than Mombasa. ✓
- Rotterdam has up to date cargo handling technology while Mombasa is less mechanized. ✓
- Rotterdam has room for expansion while Mombasa has limited space. ✓
- Rotterdam is linked by road, railway, pipeline, air as well as waterways while Mombasa is linked by road, railway, pipeline and air. ✓

- Rotterdam exports mainly manufactured goods while Mombasa exports mainly raw materials. ✓

Any 2 x 1 = 2 marks

- Rotterdam serves a hinterland of more developed countries while Mombasa serves a hinterland of developing countries. ✓

(05)

(25)

- rivers ✓  
 - roads/railway lines ✓  
 - lakes/shores ✓  
 - ridges ✓  
 - forests ✓  
 - escarpments ✓

- cargo ✓  
 - technology ✓  
 - expansion ✓  
 - waterways ✓  
 - exports ✓  
 - hinterlands ✓

**SECTION B**

Answer question 6 and two other questions in this section.

6. Use the table below to answer the following questions.

Kenya's agricultural production in '000 tonnes between 2008 and 2011.

ITEMS/ YEARS	2008	2009	2010	2011
Horticulture	57,965	49,352	40,170	68,123
Tea	55,383	64,684	87,960	100,45
Coffee	6,859	9,563	15,449	17,826
Dairy products	8,368	11,496	11,346	15,548

(a) (i) Apart from comparative line graph, name four other methods that can be used to represent the above data.

- Pie chart/divided circles
- Comparative bar graph/Compound bar graph
- Divided rectangle
- Proportional circles

*from 08*

*cumulative bar graphs*

*max 04*

Any 4 x 1 =

4 marks

(ii) Using a vertical scale of 1cm to represent 20,000 tonnes, draw a comparative line graph to represent the above data.

Kenya's Agricultural production in '000 tonnes between 2008 and 2011.

Kenya's Agricultural production in '000 tonnes between 2008 - 2011

KEY

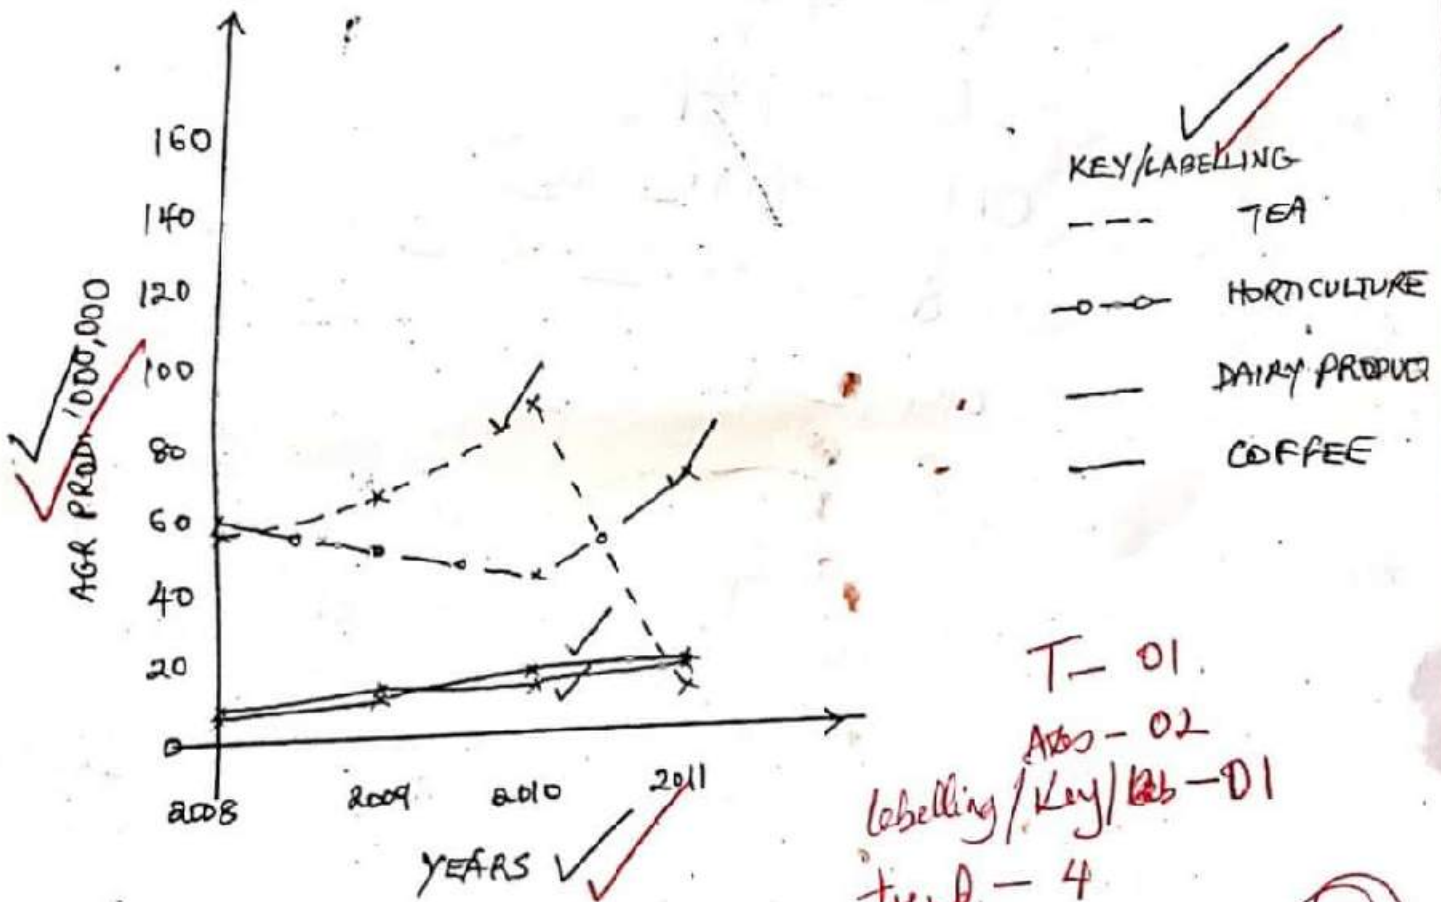

- Tea
- Horticulture
- Coffee
- Dairy products

Correct axis

- x - 1 mark
- y - 1 mark
- Title - 1 mark
- Each crop - 1 mark x 4
- Key - 1 mark
- Total = 8 marks

<p>7. (a)</p>	<p>(i) Apart from Ghana, name two countries in Africa where cocoa is grown.</p> <ul style="list-style-type: none"> <li>- Nigeria ✓</li> <li>- Cote-de Ivoire / Ivory coast ✓</li> <li>- Cameroon ✓</li> <li>- Guinea ✓</li> <li>- Togo ✓</li> <li>- Senegal and Sao Tome ✓</li> <li>- Liberia ✓</li> </ul> <p style="text-align: right;">- Sierra Leone ✓ - Benin ✓ - Uganda ✓ - Rwanda ✓</p> <p style="text-align: right;">Any 2 x 1 = 2 marks max 02</p> <p>(ii) State five physical conditions that favour cocoa farming in Ghana.</p> <ul style="list-style-type: none"> <li>- High and well distributed rainfall of 1300-1500mm. <i>min 1000-1500mm</i></li> <li>- High temperatures ranging from 21°C to 30°C. <i>warm/hot conditions</i></li> <li>- Protection from strong winds that blow away pods.</li> <li>- High relative humidity. <i>70-80%</i></li> <li>- Deep, well drained fertile loamy soils. <i>rich in iron and potassium</i></li> <li>- A sunny period for ripening.</li> <li>- Low altitude of below 750 metres above sea level. <i>max 05</i></li> <li>- Undulating landscape. <i>07</i></li> <li>- protection of young plants from direct sunlight.</li> </ul> <p style="text-align: right;">Any 5 x 1 = 5 marks</p>	
<p>(b)</p> <ul style="list-style-type: none"> <li>- cleared ✓</li> <li>- ploughed ✓</li> <li>- holes dug ✓</li> <li>- transplanted ✓</li> <li>- rows 3m apart ✓</li> <li>- nurse crop ✓</li> <li>- weeded ✓</li> <li>- pruned ✓</li> <li>- manured / fertiliser ✓</li> <li>- sprayed ✓</li> <li>- mature at 5yrs ✓</li> <li>- pods grow on trunks ✓</li> <li>- yellow/orange when ripe ✓</li> <li>- two harvesting seasons ✓</li> </ul>	<p>(i) Describe the process of cocoa cultivation in Ghana.</p> <ul style="list-style-type: none"> <li>- Land/vegetation is cleared and ploughed ✓</li> <li>- Cocoa trees are grown from seedlings sown in nurseries. <i>Holes are dug in the farm.</i></li> <li>- The seedlings are allowed to grow to a height of a few 28-30cm centimetres before they are transplanted to the field.</li> <li>- Seedlings are planted in rows, three metres apart in cleared forest zones.</li> <li>- Nurse crops eg cassava/beans/bananas are planted ✓</li> <li>- Some cocoa trees are grown from cuttings, which are placed directly from cleared forest.</li> <li>- The plants are weeded occasionally and manured to improve the quality of the bean and prolong life of the tree. <i>crop is pruned and</i></li> <li>- The trees are protected from insects/pests and fungi by spraying with insecticides. <i>fungicides</i></li> <li>- The trees begin to produce from five years, up to 30-40 years. <i>mature pods</i></li> </ul>	

- The cocoa pods grow on the trunk and the main branches of a tree.
- They become yellowish/orange when ripe, there is no set time for ripening. Both flowering and ripening can take place at the same period.
- There are two main harvesting periods. That is between September and February and between May and August.
- The crop is harvested manually using long sharp knives.

Any 6 x 1 = 6 marks

(ii) Give three uses of cocoa.

- It is used as a beverage.
- It is used to manufacture cosmetics.
- It is used in baking/confectionary.
- It is used to make sweets/ice/cream/flavourings.

- used in the production of alcohol/brandy
- used in production of fertilizers
- used in mulching

Any 3 x 1 = 3 marks

(c) (i) Explain three human problems faced by cocoa farming in Ghana.

- At times cocoa farmers are demoralized because they do not get good price for their beans due to world price fluctuations.
- During the rainy seasons, the feeder roads become impassable leading to difficulties in delivering the crop.
- The trees are attacked by pests and diseases which destroy the trees, e.g. black pod and swollen shoot.
- The low prices cannot sustain the farmers hence there has been a slow drift into better paying jobs in industries.
- Cocoa growing requires abundant labour throughout the year.

This is not always available especially during harvesting.

- low labour supply during harvesting season
- the poor management of the farm

Any 3 x 2 = 6 marks

- the limited storage facilities leads to wastage/spoilage of cocoa.
- competition for land from other crops leads to low production
- the poor extension services leads to low quality cocoa production
- competition from other beverages lowers the market demand for cocoa
- High cost of input lowers profit margin

- Beverage
- Cosmetics
- Baking
- Sweets
- animal feed
- soft drinks
- drugs
- alcohol/brandy
- fertilizers
- mulching

- price fluctuation
- impassable roads
- low prices

- input technology / research  
 - cheap / affordable  
 - skilled labour  
 - gov policy / peace / stability  
 - large pop / transport  
 - HEF  
 - Meiji emperor  
 - Education system

- The advanced technology and research has led to efficient methods of production of high quality cars at minimum costs.  
 - Japan produces fuel-saving vehicles leading to a high demand for them in the world market.  
 - Japan has highly skilled and industrious work force which has promoted massive production of quality vehicles.  
 - The government policy / peace and stability has encouraged industrialization.  
 - The presence of large population with a high purchasing power provides a large local market for the cars.  
 - The efficient transport system which eases the transportation of raw materials.  
 - Large hydroelectric power production for industrial energy.  
 - The rise of empire Meiji who promoted industrial development.  
 - The education system which has given rise to skilled manpower / advanced technology.

- absent/inefficient system  
 - capital  
 - language barriers  
 - inadequate facilities  
 - vandalism  
 - civil wars/terrorism  
 - varied landscape  
 - pol. interference  
 - low tech knowhow

liberalization/modernization  
 - Trading blocs/favourable conditions  
 - wireless telephones  
 - satellite facilities  
 - internet  
 - training/modern  
 - peace mission/restoring stability  
 - legislative/facilities  
 - entrepreneurship/initiative  
 - ↓ tariffs/affordable

- many African countries are signing protocols on modern skills of communication  
 - Establishing peace missions to enhance development  
 - appropriate legislation is being put in place to facilitate communication  
 - encouraging entrepreneurs to invest in the communication sector  
 - lowering tariffs to make communication affordable
